

Your

# PIN NUMBERS

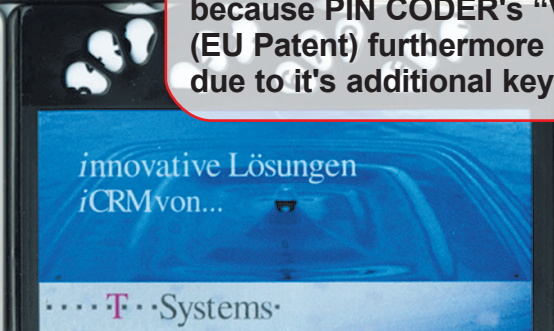

- handy & safe !

Why remember "a thousand" PIN numbers when one will do? – the self selectable Master-code as keying number for the central access to the PIN CODER (EU Patent) –

... because PIN CODER „Made in Germany” protects all your PIN numbers from theft.

The thief of a PIN CODER does not get access to your keyed PIN numbers (and to your money) even knowing your central keying number (Mastercode), because PIN CODER's "VARIABLE MASTERCODE" (EU Patent) furthermore prevents unallowed access due to it's additional keying.
