

PIN *memoCard*

with analogue double encryption quarantees secure storage of up to 10 PIN

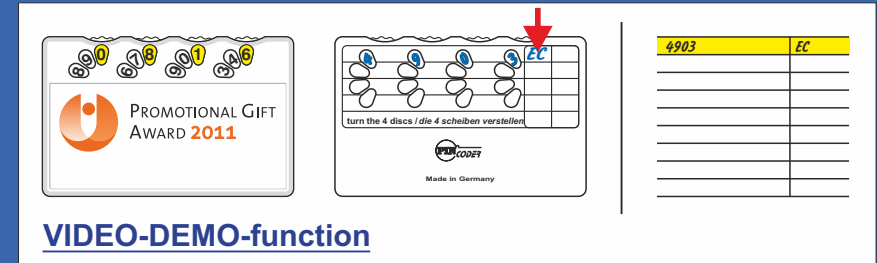

The analoque double encryption system with "VARIABLE MASTERCODE" corresponds to a twofold password.

It increases the possible 10 000 variations of a 4-digit PIN to 810 000.

It prevents a thief from gaining access to the ecryptian system even if he knows the PIN

No Internet – no battery – no user errors!
